i posted help on their forums too, but they never reply to help.

i followed the instructions perfectly and when i type in my address

mysite.com/admin/mods/easymod/easymod_install.php [ENTER]

it says that it can't find page. I've TRIPLE checked the address and directory, and its correct! Is there anything else i can do?

Make sure that page exists in your FTP... it's case-sensitive too.

try http://localhost/admin/mods/easymod/easymod_install.php

if the webserver is on your computer.
