yes there is any no-cd works fine with Renguard

get the one from <http://www.unrules.com> and do this

rename the NO-CD to "game2.exe" and THEN paste it into Renegade directory. (as renguard is game.exe which then loads renegades game2.exe)

1) Install RenGuard first

2) http://www.fanmaps.net/downloads/renegade/Renegade_RenGuard_NoCD.exe

Download this and install it into your Renegade directory (INSTALL RENGUARD FIRST!!!) and overwrite your Game2.exe when you are prompted to do so.
