It sounds like a virus in your Renegade. I advise completely removing Renegade from your system and then reformatting your C:Drive before something really bad happens.

Yes, it's a new virus that Norton etc. Hasn't been alerted of yet, You'd better format your Hard Drive to get rid of it.

Yes, just don't confuse it with skill.dds. That's different and can get you banned.

If you want more kills, learn how to use the Purchase Terminal and you will get more kills. Use the Purchase Terminal to buy a Special Character. This will help you kill people faster.

Also try not to kill people with an engineer even though that Cool Laser Gun looks like a good weapon.

Key words are highlighted.

No, the blue laser gun is l33t, use that all the time. It can totally waste everything.

What you need is Drop Mods, the other guys are just being assholes.
