There is a program somewhere that allows you to do this, I'll look around and see if I can remember where I found it.

Welcome by the way.

I used to know how to change it.

The file you need to edit is in:

Renegade/Data it's called svrcfg_skirmish

I forgot what to add though.

Your site doesn't like FireFox. It works just fine in IE, but open it in FireFox and you're asking for trouble.
