Can someone please give me a thorough guide or explanation on how I can get the Crates and Rebuildable vehicles working because I have everything configured in the brenbot and the scripts.dll that came with it and server2.ini and it still will not work. Can someone please tell me why not or give me a guide to exactly follow? If i need to get Dragonade seperate then can someone tell me how I would put it in there with the scripts.dll already in there. Whichever but can someone please give me a really damn good explanation because ive tryed everything

Look in server2.ini if wreckages and crates are enabled. You need to have SSCP1 1.3
