I had this problem on my really really old computer, its probably because your machine isn't powerful enogh to run it.

Whats your system specs

Video card: ATI 9800 Pro  
RAM: 1 GB  
Windows XP  
70 GB SATA harddrive  
Trust me, i can run the game . Old time player returning.

Try the no CD patch?

Download the latest patch from <http://ftp.westwood.com> if you're unable to update it on WOL, then download and install this:

[http://www.beaconpedestal.com/nocd/djlaptop\\_renegade\\_1037\\_nocd.exe](http://www.beaconpedestal.com/nocd/djlaptop_renegade_1037_nocd.exe)

Or try the technical support forums :rolleyes:

Re-install maybe?

i had that problem when my data disc when scratched..

either try a no cd patch or start renegade with disc 1 from your disc drive.. NOT THE REN ICON - when it asks u to put in disc 2.. just hit cancel and it SHOULD take u into the game..

thats my guess.....
