Alot if claims are lies or missinformation.

Examples:

A few moths ago some guy made a object.ddb file that can he claimed can be used to cheat renguard, lol it was detected by rg and you are kicked out in seconds of using it. Tatal bull....

There was a guy that said he found a way to get around renguard and play in rg servers without using renguard and what do you think it was? He was playing in 1/2 guarded servers that you don't need rg to play on.

I see ppl that one day say that rg is a joke to bypass and they can do it easy, then a few weeks later they say that they can't realy do but they know how then a few weeks later it's back to thy can't do it at all... Make up your mind and stick to it.

And there are still ppl talking about exploits that were fixed months and months ago.

Nobody uses C130 drop mods to cheat. People just use them to screw around (like my unreleased mod that puts 40 obelisk turrets onto an apache helicopter ). I used to be very good at making drop mods, but I lost interest after I pretty much did everything there was to do. Still, it was pretty fun to make a recon bike that gave you 20,000 Credits every second, or a helicopter that dropped 20 assorted hidden vehicles, or an invisible orca with a weapons factory attached to it...

C130 Drop mod works for everyone on a server, so its no real cheat.

ghostSWT, You hit the nail on the head!

RG blocks types of cheats not individual cheats. If there is a \*.w3d file that shouldn't be in the data folder, you can't play. If there is something out of place with Always.dat, objects.ddb or any sort of trainer, it can all be detected. The only way you will be able to cheat is if you find some kind of bug or find a completely new way to cheat. Nobody is that desparate.

It's to the cheaters' advantage to boast and brag that they bypassed RenGuard even if they haven't. It's their job to keep people off of it by casting uncertainty as to its effectiveness.

I won't say it's unbyassable. I will say that MANY people are lying, flat out, about being able to. RenGuard protects you from 99% of potetial cheaters, while NOT running it protects you from 0%.

Furthermore, we have had 2,586,796 player logins to RenGuard since its inception. I bet none of those cheats can claim they've been used that many times.

PistolServ is 1/2 RG i think. I cant remember.

When playing ren, it helps to use snipers in muti player pratic, it helps you accurecy. Play a sniper game once a week for a game or 2. This helps your aim.

Also, hosting small games and being in small games also help.

My whole points in hosting this post was to EXPLAIN the problem about cheaters on WOL. Prescisely on HALF-RG Servers. I am not complaining really but am nearly trying to explore the thought of TOO MANY CHEATERS on WOL. I can't believe that there are so many true gamers out there that won't support someone in an effort to ban or kick cheaters. My second point was that i wanted to send a message to all the cheaters.

Cheating does not make you better. If you want to get better without cheating then play on the big

---

servers alot. One reason why people start cheating is because they get sensitive about the ranks. RANK does not truly matter. Many new renegade players cheat so they are good at the start. Whats the points of cheating and dealing with all the smack talk to you on the servers.

Think about all this very hard.

And i cant beleive that you cant even get support from gamers to ban or kick cheaters.

If you guys support renguard, and trust blackhand studios, then why not support other players on the mission to STOP CHEATERS?

I am not really complaining but nearly explaining the issue that seems to be getting worse.

AND DONT FORGET TO HAVE FUN WHEN PLAYING RENEGADE. I KNOW I DO!

And is there really a reason to keep calling me a n00b and a sucky player spoony?

If you did watch the UC forums, as i suppose some of you do... you will see that i dont make cheats for myself... i make them for other people...

My .MIX maphacks were probably the only cheat i have really made for myself. And honestly, even though not a secure bypass, the delay of renguard detecting the cheats is enoguh for me to play 2-3 games, and then only be kicked so that i can join again and do the same.

Ok you want a reason why we 'cheat', illgive you one... as i know noneof you really know unless you cheat.

We love to see you get pi\$\$ed off at us. Watch you squirm as you try to inevitably regain control of your server, we love to see how long and how much devastation we can cause. I will only talk

about renegade and its affiliates in here, not any of the other things i do... Which you will never know...

I wonder if any of you remember 'SEVEN'...? THE INVENTORS OF SSG! WHICH RENGAURD IS A RIP-OFF OF!

SSG = Seven Server Gate, created by [Seven]Ares and [Seven]Eros.

They ae the true inventors of an anti cheat system....not you.

You may have risen to the top of the hill, buton the other side is a steep slope to hell!

Seven's SSG does not predate RenGuard. Get your facts straight.

RenGuard was in development since August 2003, long before SSG, to my knowledge. I remember for a fact that I talked to Ares back when RenGuard was about to be released

And if you compare both system's infrastructures, you can see that they are nothing alike.

ADMI heard of a few cheat communities that also claim to have bypassed RenGuard. Sucks really, they are always going to find a way around or an exploit.

There will always be a few communities that brag to bypass RG. Not saying its impossible, but its sure as hell extremely improbable...The reason they will brag this is because they want silly, gulable little kids to download their cheats onto mommy or daddys machine, unzip said cheat and release the lovely little virus attached to the cheat into mommy and daddys computer, giving them some control over that machine or information on the people using it.

Let the retards download all the viruses they wish to, as long as RG holds up and both servers

---

and players continue to use it, the genuine gamers in this community need not worry.

Deadfive I am not complaining really but am nearly trying to explore the thought of TOO MANY CHEATERS on WOL

That thought was explored ages ago, its why RG exists today.

I've always known that the #1 reason that cheating fags like you cheat is to get off on making people mad. Everytime you kill someone you practically jizz in your scooby doo underwear with the glee of having "pwned" someone, and thinking that they are so mad at you that they wish they could reach through your monitor and kill you, but they can't and you are just some godly figure laughing as you stir up some little ants.

The truth is, nobody is in awe of you, or really gives a rats ass about you other than that you are interrupting a game. You don't anger us, you simply cause us to pity your pathetic little lives as you giggle at your monitor in your dark room, with your failed report card and crusty socks from jacking off to shemale porn because you are too antisocial to have a girlfriend, much less any real friends.

RenGuard owns you. You are nothing to us, but another banned cheater. We get over you the second you are kicked. Maybe you should do the same.

LOL These pathetic kids sound just like the old WSE guys did. Acting like its some kind of war between "them" and "us". Get real it's just a game. We like playing it and will continue to do so, and will continue to make sure its a fair game and nobody is cheating. It's really quite amusing how you act like its your right to cheat and that we are the ones in the wrong just for wanting to be left alone and have fun playing our game.

Doesn't matter since you cannot hack RenGuard (and I know how hard dorks like Cyberpunk are trying), and the best of us only play on RG servers. You can still get your jollies by cheating on n00b servers, if you like shooting fish in a barrel. I guess that is huge entertainment for small brains. I really doubt there is more of "you" than there are dedicated players, and like I said RG owns you so doesn't really matter.

Keep on calling yourselves "hackers" and whatnot....LOL. You guys load up leveledit, change some presets and call yourselves hackers...lol the stuff you are doing is no more difficult or complex than the things people do while playing an RPG game. No skill at all. Just like the people who spraypaint their name on the wall of a building and think they are cool, when really people are just laughing at how pathetic you are.

Ah well...keep up the good work, the rest of us will need you in a few years when you grow up and are pumping gas for us

Good riddance :twisted:

if you putit like that why should i leave...

supposedly, i am;

pathetic  
a loser  
an idiot  
without a girlfriend  
someone who masturbates to shemale porn...

etc...etc

ok, as i said before... i wont discuss my life outside renegade, cos u will only think i am flaming...  
oh fuck it, why not flame... i wonderif any of you know anything about how a computer really works... apart from what your standards are... "push button... computer bleeps". no... do any of you know ASM, VB, C++, binaary, hex, decimal???

shitty example i justcame up with for the UC board...

Decimal - Hexadecimal

Start Number.. 5678

$$5678 / 16 = 354.875 = 354$$

$$354 * 16 = 5664$$

$$5678 - 5664 = 14 = E$$

New Start Number.. 354

$$354 / 16 = 22.125 = 22$$

$$22 * 16 = 352$$

$$354 - 352 = 2 = 2$$

New Start Number.. 22

$$22 / 16 = 1.375 = 1$$

$$1 * 16 = 16$$

$$22 - 16 = 6 = 6$$

Answer = E26

Stop thinking you know the meaning of the word hacker... you dont... the meaning itself is quite harmless... in my opinion...

maybe you would think i am calling myself a cracker, now that would be someone you should fear....

i have allready said in the UC forums that objects.ddb "hacks" are not truely hacks, at most the could be called mods, if not cheats...

XeonTeam

Start Number.. 5678

Answer = E26

????

is this Decimal to Hexadecimal conversion?

well you got it 100% right except for a lil part

5678=162e

Start Number.. 5678

$5678 / 16 = 354.875 = 354$

$354 * 16 = 5664$

$5678 - 5664 = 14 = E$  <<last digit

New Start Number.. 354

$354 / 16 = 22.125 = 22$

$22 * 16 = 352$

$354 - 352 = 2 = 2$  <<2nd to last digit

New Start Number.. 22

$22 / 16 = 1.375 = 1$  <<new number is less then 16 so it's the 1st number

$1 * 16 = 16$

$22 - 16 = 6 = 6$  <<3rd to last digit

162E

first learn something b4 you show of your INCORRECT skills, lol

WANNABE, YOU GOT OWNED

Quote:do any of you know ASM, VB, C++, binaary, hex, decimal??? yes I know them all. But i think that knowing "binaary, hex, decimal" is almost pointles because ther are 100000 or difecent

converters that you can use. No need to spend 3 mins trying to find that 10010001 11001001 01010101 is in hex just copy and paste (10 secs) and you get 91 c9 55.

Blazer!ve always known that the #1 reason that cheating fags like you cheat is to get off on making people mad. Everytime you kill someone you practically jizz in your scooby doo underwear with the glee of having "pwned" someone, and thinking that they are so mad at you that they wish they could reach through your monitor and kill you, but they can't and you are just some godly figure laughing as you stir up some little ants.

The truth is, nobody is in awe of you, or really gives a rats ass about you other than that you are interrupting a game. You don't anger us, you simply cause us to pity your pathetic little lives as you giggle at your monitor in your dark room, with your failed report card and crusty socks from jacking off to shemale porn because you are too antisocial to have a girlfriend, much less any real friends.

RenGuard owns you. You are nothing to us, but another banned cheater. We get over you the second you are kicked. Maybe you should do the same.  
You didn't just kill him, you killed his whole family.....ROFLMFAO

Remind me to NEVER, EVER, EVER ... Piss you off....ROFL

XeonTeam1 little mistake andu will go all out to make sure i am eaten alive... which you should be...

I see many mistakes there. And you're right, they should make sure you're eaten alive. Why wouldn't they?

XeonTeam  
4. Bye bye...

Knowing how to convert hex to decimal does not make you a hacker or a cracker. Nor does it make you seem smart, especially since you fucked it up anyway. Windows Calculator can convert between Hexadecimal, Decimal, Octal, and Binary... at least you could have checked your work.

Quote:

We love to see you get pi\$\$ed off at us. Watch you squirm as you try to inevitably regain control of your server, we love to see how long and how much devastation we can cause. I will only talk about renegade and its affiliates in here, not any of the other things i do... Which you will never know...

WARNING:

Do NOT attempt to fuck with this individual. He has such a large E-Penis that it could gouge out your eye.

Making maphacks does not make you a cracker or hacker. Converting decimal to hexadecimal doesn't either.

I would like to know what you have hacked or cracked before. (If you have... )

Lastly, instead of trying to ruin games, wouldn't you get more enjoyment out of... Hmmm.... actually PLAYING THE GAME?

XeonTeamill create my new name now... lol, so that you wont know who i am anymore... you've said that before... and lo and behold, you're still using the same name. You know, I'm willing to bet you're so god damn retarded you create your new name using the same IP so the forum admins can instantly see it's you. Since you're hardly the sharpest tool in the box, it really wouldn't surprise me.

XeonTeamandi wont readthispost again,foryoureplies..

Again, you've said this before... but you replied again several times :rolleyes: retard
