Under Mix, 40 players

I didn't expect to get away with it, but persistence is rewarding....sometimes

I finally made it down Nod tunnel by disarming some mines to Power Plant tunnel entrance. Made the first rock, got to edge of wall and waited. Fortunately for me no one felt the urge to use the GDI tunnel. At that time the Obolisk fired at a GDI tank that exposed itself and I made my run. Went through rear door of HON and now it's time for the video

Getting away with this tactic in a 40 player game is rare indeed.

Dude everyone knows that, and that was a terrible way to defend the hand, what if someone came through the top door? You wouldn't have seen them disarming mines

Geezus, I thought I was the only person in the entire world that knew how to do that <sarcasm>  
my point is: do it in a 40 player game. My objective was to destroy Hand not defend it and I don't know about you, but I have the sound volume turned up when I play and I would have heard any engineer making an attempt at disarming my C4 :rolleyes:

Actually thats the same way i defend my c4's. Because if someone comes in a chases you through the lower door, theres plenty of ways to kill or evade them.

And Rip, where did you get that skin? Did you make it?
