Hello All,

I would like to make a text based game with admin and everything. But I have a problem. I have the PHP skills to create the game but not the graphical skills. Would someone build me two templates, one based on the team GDI, the other on Nod (NOD), which ever you want to say,

I don't have any money to offer you so I will give you complete administration over the game with me. You will have Root access to the admin system and can't be modified, only be your account or by the database.

Please reply,

Dead6re

PS: Thanks to anyone that offers.

Text based game based on Renegade. Im building it since i don't like the other C&C Text Based Game.

Size doesn't matter. But no bigger than 750 pixels if you could. It doesnt matter too much though.

What do you mean it's easy to make a text based game? It's not, something like Kings of Chaos or the C&C one would be easier than the one I'm making, but either way it takes a lot of time to code a text based game.

> wear a mask

You take the mask from your backpack and put it on your face. Unfortunately, the horse is angered by the mask and runs over you.

G A M E O V E R

dead6relts not easy, but I can do it. Just need the graphics.

So like 750 x 750 ?

I'll see what I can do but i'm not promising anything.
