When installing the Core Patch 1, the DOS prompt came up and did the installing thing but it stopped at scripts.dll (I think) and said "Error 17"

What does this mean, and how do I fix it?

Renegade seems to run OK (WOL doesn't work for me so I haven't been able to test it)

OMG, I wish people did searches.... :S

BHS, make some kind of FAQ for Renguard which solves this error message..

I did do a search for "17" but that yielded no results, However "Error 17" did yield results when I checked just now - sorry.
