I am playing renegade on a laptop. I'm not always connected to the internet When I try to play one player when I'm not connected to the inet, I cant play reneguard at all because Renguard cant connect to the server. What kind of cheap crap is that? I mean, if I'm going to keep a 1 GB thign on my hard drive, I want it to work. Why is it 1 GB anyway? it doesnt do much...

First off, RenGuard is not 1GB. Windows thinks it is because it takes all files from the Renegade folder.

And you can play the game without RenGuard by going to your Renegade folder and then running Game2.exe.
