This is so gay, today I went out and bought a new Geforce 4000 128mb AGP card on sale. I thought I was getting a good deal. But when I got home and opened up my computer, all my computer had was 3 PCI slots.

So now all I can do is take it back and then trade it in for a Radeon or something that is a PCI card.

I hear ya. I have not bought a card yet but when I found out that my pc only had PCI slots, well, GRRR!

I don't know where to get a new card, could you tell me?

Sorry I bought my Geforce at the local staples--so that wouldn't be relevant to you, unless you lived in Manitoba.

I hope I can still take it back

They have staples everywhere...

Just order it off the interweb.

My Mother Board fucking sucks too. It only supports AGP 4x and has two slots for ram.(1Gig max) , I'm upgrading my mother board next with a new processor.

I'm thinking of getting a Geforce 6800 after that.

I just bought a Geforce FX 5500 with HL2. Runs smooth with my current processor. (30-50fps) It was only 90.00USD.

My brother was stupid enough to buy a AGP card after looking at the mobo and deciding that the PCI slot was AGP. :rolleyes:

I tried to explain to him... but no. Lucky for me he never got his money back.

Bleh , That is just the first link I found on google. I don't plan on buying off the internet and for another 2-4 months. I'll go to one of these regular show and sale things we have over at the hara arena in ohio. Grab one for like 150.00-180.00USD.
