This is hilarious...this guy says that RenGuard has a virus, and it does at least the following:

some n00b
Virus Contains:

Mouse Controll

Renegade Auto Shutoff
Disables clock
Winamp functions fry
TeamSpeak disablers
and I'm still lookin it up..... There's possibly more....
Just thought I'd let you guys know..

I got into Renguard own system and found a SystemINI374.Inx file that contained all I said

Found another part of it..
Screenshot disabler..
This guy's smart.... Doesn't want anyone finding out what it does.... Damn it... Now I have to have a system scan and find where this screenshot.INXE (E is Expansion) is.
Erm.... I dunno what this is.. but this (Another INXE) file says it's a Renegade/Renguard Homing Protocall... What the fuck?
I foudn the last thing in the virus..
All it is, is a simple tracking device I have to encode to track who ever did this. Whiiich won't be easy...

LOL!
