Hi...

I tried to look at old posts but couldnt find it. When I tried to install the No Cd Patch it came back an error of "Game.exe: Unknown version." Is that because of Renguard?? Do I need to uninstall Renguard, install the No CD Patch and then Re-install Renguard??

Thanks for your help.

Disreguard

I found zunnies sticky and saw Blazers post at the bottom with his No CD Patch and used it and it works fine now

Thanks

try this: take the data cd and move all .bik and copy them into your \data directory in a new folder called "movies".

this will prevent the msgs asking you to insert the data CD for cut-scenes and at start up. to skip the begining movie all together (and no prompt) open notepad and save a blank file called "EA_WW.BIK" and another called "R_Intro.BIK"

***NOTE: when saving, you need to manually put the extension in the filename AND where it says "Save as Type:" select "All Files" OR ELSE IT WILL SAVE AS "R_Intro.BIK.txt"!!!!

this is one No-CD hack that I figured out myself (i feel special!) and im sure others have figured it out too.... hope this helps!

dufis791 wrote on Sun, 03 July 2005 18:07this will prevent the msg's asking you to insert the data CD for cut-scenes and at start up.
Or you could do this:
Insert Data Disk into the Disk Drive.
Close the Auto-Run pop-up.
Run Renegade from your Desktop Shortcut.
Thats how i do it.

BLAH this is one No-CD hack that I figured out myself (i feel special!) and im sure others have figured it out too.... hope this helps!This is way too much to do for a simple NoCD Crack!

Unfortunately, http://m0002.gamecopyworld.com/games/gcw_index.shtml removed all files for Renegade , but I found another Site: GameFix.

The Link here <http://66.79.179.19/renegade.htm> brings you directly to the provided Fixes/Cracks.

They are all for the english version of the Game. if there are german gamers, I can help out because I saved the only german NoCD few years ago from Gamecopyworld.

I didnt test the Cracks on GameFix, but I can say that my german Crack is much easier to use

than these Instructions I quoted here. Just unzip the game.exe BEFORE installing Renguard and confirm the Checkbox of Winzip in case of overwriting the original game.exe. Then install Renguard as usually. You dont need to put dummy-files in your folder or such things, Renegade just starts in the main menu. The FMVs between the Singleplayer Levels are gone and the opening FMV with Havoc too. This saves a bit of time getting started to play online...

Oh and I forgot... To those who never trust a NoCD Crack, just burn a legal Backup Copy of your CD 2 with Alcohol, CloneCD or similar and use this instead of using the worthy original...

For the record, there is no "german nocd crack" or any other foreign language game2.exe crack. All you need is a game2.exe that is modified that it doesn't require the cd, your installed language does not matter.

At the time I downloaded my cracked game.exe, it was described as the NoCD for the german 1.037 version. But I agree with mac that it shouldnt matter which crack is in use.

The only difference in my Crack is that it is the game.exe and it replaces the original game.exe before RG will be installed. After RG is installed it, it creates a game2.exe , as we all know.
