Hey, I want to burn a 2 GB file on to Regular Data CD's, does anyone know of a program which lets me split the file into parts and recompiles it on what ever it is being instaleld to, like unreal tournament 2k4 style. The File is a EXE which makes this hard... Thanks

Just use winrar and set the size of each part to 700MB or whatever the size of your CDs is.

WNxCABALOr Buy a DVD-RW

Or an external hard drive.
