I just reinstalled Renegade, Installed the Patch, The no-cd crack, and then RenGuard, I got it updated with CP1, and then I joined the n00bstories server, and it says I'm not running RenGuard. Does anyone know what is wrong?

Did you update Renguard to 1.03 (I think that's what it is at), then install CP1?

It is your first time running RenGuard after installing, right? It doesn't recongize you until after you sign into WOL.

I updated RenGuard first, and then got CP1  
I added my profile at the end of the Renegade isntallation where it asks you something abotu if you would like to select an online profile to use, or soemthing.
