It won't let me connect! I was playing Renegade 30 mins ago!! I get an error message saying "Unable to initialize network, perhaps your firewall is incompatible with RenGuard" my firewall is on but when I turn it off it still won't work. I restarted my PC under my firewall settings, (in exceptions I have Renegade on so it doesn't apply). I don't have "Don't allow exceptions" on. Why did it work a bit ago and now it's not? Please help!

RenGuard uses port 6300. Make sure your Firewall accepts this port.

Sorry for DPing but how do you check if it allows that port? There's something that says "Add Port" do I click that and write in 6300?
