Subject: Unauthorized file game2.exe has been found. What??

Ok I accidently broke my CCR CD when I was moving into my apartment (it got stuck under my desk leg). So I downloaded a no CD patch for it and it worked fine and have never had problems with it.

Now since there are a whack of cheates on CCR now I want to install Renguard but when I do I get this message "Unauthorized file game2.exe has been found in your renegade directory".

This has to be from the No CD patch that I downloaded. CCR is different, like people make sounds when you kill them and the oblisk charges up and I thought that it was working but then was booted from a game for not running RG.

Im a decent player and it sucks when I get kicked because I play good. Everyone thinks Im a cheater, which I am not. Please if anyone can help me out I would appriciate it.

Thanks

-uninstall renguard
-backup all maps & mods
-uninstall renegade
-re-install renegade
-apply 1.037 patch
-apply no-cd patch
-install renguard
-apply CP1 (optional)

hope that helps!

I did search, but nobody had the same problem I have. Since I cant reinstall it because I busted the CD from dragging it across the floor with my desk I went on Amazon.com and ordered one of those bundles.

It comes with Renegade, Red Alert 2, Yuri's Revenge Expansion pack, Generals and some other CC games. I already have had RA2 and the Yuri Expansion pack but they were stolen.

It was only $35 shipped for all of them so Ill just wait untill mid next week to uninstall it all and then use renguard. In the meantime Ill just take my chances without having RG.

that should work
from what it looks like.. your tring tp patch a game.exe which has already been edited for NOCD
or thats trying to patch renguard
