Some of my favorite things all on one desktop!

Edit - Sorry, lame freewebs being retarded - copy & paste if your inclined to go thru the trouble...

Gernader8Hey Majiin Vegeta, what server are you on in Final Fantasy XI?

---

been on sylph for the past year and half.. hardly play now  
the game feels like a drag  
My character

Very nice monitors jeff O\_O  
must have been expensive

This was taken in February I think.. but its basically the same desktop, apart from 2 more icons  
down the right hand side

(Hardly any icons for teh win ... Messy desktop for teh bin)

deadfiveWhere can I get new desktops? Or how do I make them?  
You're serious? You can't figure out this HARD process, but yet you can install and play a game online all on your own? You can also (somewhat) make a (barely bearable) site, but not figure out this daunting task of changing your desktop? Riiiiiiiiight.

Maybe, just maybe, I should have been more specific. How do I change the taskbar color my own custom color?

If its not the taskbar, then the thingy with the start menu

Deadfive, I'd be more than happy to help. Take your image and put it in paint. In your system folder, save the image as "explorer.exe" with the quotes. When it asks if you want to overwrite the file, click yes.

JUST KIDDING, if you do this your computer will go boom.

Incognito told me about it, it's called BBlean.

<http://bb4win.sourceforge.net/bblean/>

Have fun.

He uses/used BBLean. It's BlackBox (window manager) for Windows. It's pretty cool, but it's a hell of a lot different from Explorer.

Glyde, there is a MUCH easier way.

Google search how to disable Windows File Protection on your PC, then go ahead and do it. Then delete every thing from %systemroot%\system32.

If windows can't delete everything, it's ok just delete as much as you can.

Then this is the important part. Turn off your computer, the turn it back on, but as you do keep pulling the plug on your computer. Do this about 15-20 times. It sounds shoddy, but you have to do it so windows recognizes the changes. Then turn on your computer and view your new desktop wallpaper!

Still no one has told me yet. "How do you change the color of the taskbar at the bottom?" I would like it to be a custom color such as #333333. That would be nice. And how would I get that color to apply to the windows as well?
