Hi what gust started now was i was on Renegade and i had to do something so i shut it down.
Then when i came back on I logged in and it said cannot conecect to sever your password is
invaid! When i of corse remebered my password and i retyped it it and i tryed that for 15 times and
it still would not work   So please help me

I think if you just shut down and don't let it log you out then Wol thinks you're still playing, and
therefore won't let you log in.

If I'm right (which is doubtful) then you'd otherwise end up with 2 people using the same nick,
which is potentially bad.

This problem should now be resolved.
WOL is working to a standard.
