I HATE IT!!! I HATE IT!!!

First of all i cant play online because of the mods and skins i downlad AND MAKE

Second of all i cant play single player without going online (I have AOL and dial up)

3rd IT JUST IS A WASTE OF VALUBAL SPACE ON MY COMPUTER

I dont even know how to uninstall it, the readme doesnt explain any thing usefull.

Can any one help?

Go to your C:\Westwood\Renegade folder (or whatever other directory you installed Renegade into) and change game.exe to game-rg.exe. Then, change game2.exe to game.exe.

PS: i think that the people who made this and the people who use it are all babies. WHO CARES IF U GET CHEATED? LIVE WITH IT OR QUIT THE GAME!!!

it would make more sence to stop every one but u fron cheating because onther peoples renguard will stop u.

that way u wouldnt have to worry about downloading mods and skins.

Its not fair either, beause servers require this damn acursed thing.

The only reason i think people get renguard is because they want to play renegade online not get protected... Actualy i dont care if there is any one cheating all u have to do is say someone is cheating when u find out and just play with them untill they are kicked

it makes the game harder and more fun to play.

Look im not encourageing cheating or any thing but i just want to let every one know that how unfair this stupid thing is.

ALL I WANT IS TO PLAY RENEGADE AGAIN!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

WNxCABALHow the fuck can you play Renegade when somebody is spoiling it for everyone else?

Exactly, I'd rather the cheater not be there in the first place rather than get killed a hundred times, lose the game, drop a thousand ladder points (whatever that means) and about the same in the rankings, plus get mightiliy pi\*\*ed off that some a-hole decides to f\*ck about with a game that I'M TRYING TO PLAY PROPERLY, find out who this bastid is and get it kicked, then banned because the imbeciele (sp?) would no doubt come back to inform us that "I am teh ownz0r, I am so l33t" and make me want to punch it's lights out, even if it's a 13 year old kid.

I've probably gone too far, but it's my opinion

The only reason you won't be allowed to play is if the "mods" you are making, could be used as cheats.

Skins are allowed if you join a server that is not marked as "pure."

first of all, you can play online with skins, therefore you are a dumbarse

second of all, send the W3D files of the RG to be autherized

Quote:Second of all i cant play single player without going online (I have AOL and dial up)

AOL = arseholes online, dont use them

but anyway, what are on? load game2.exe instead of game.exe :rolleyes:

my ass it builds up skills of stealth, to kill a cheater it takes at least 10 people dying twice just to kill him. And GUESS WHAT? They are still there raping everyone in the game and ruining the whole game for everyone. :rolleyes:

The only reason I see that you are so against Renguard is because YOU are a cheater yourself.

FUCK OFF.

I never want to see you post here again, EVER!

You can play renegade offline with renguard installed you fucking numb nuts, open game2.exe !

Second of all, cheating is not accepted and shouldn't be accepted! The only reason you are against it is because you found some "leet hax" \*cough\* off those EAX fucktards.

Third of all, Renguard uses INCREDIBLY low system resources, not enough to even be noticed. It also takes up hardly ANY space at all of your hard disk. 16Mb! Thats practically nothing!

Forth, Ever heard of Add/Remove Programs in control panel? Take a wild guess at what it does you retard.

I suggest you fuck RIGHT off and never come back you unnapreciative, arrogant, 12 year old son of a goddamn bitch.

No, nobody can help you. You're a fucking retard. AOL is too easy to use, no wonder fucks like you get online in the first place. Do you know anything about a computer in the first place? Do you know that RG takes up less than a fucking megabyte? Get the fuck off your PC and go buy a Mac, you dumbshit.

I'm glad I'll never see you in any of the RG servers I play in, although I'd like to see you get your head caught in my custom reticle that is allowed just like every other texture.

DJMThird of all, Renguard uses INCREDIBLY low system resources, not enough to even be noticed. It also takes up hardly ANY space at all of your hard disk. 16Mb! Thats practically nothing!

```
Directory of D:\Games\Renegade
07/07/2004 01:07 AM 361,472 game.exe
01/31/2005 06:36 PM 157,696 bhs.dll
2 File(s) 519,168 bytes
```

RenGuard takes up less than a megabyte. It may appear to be more in Add/Remove programs, because windows is stupid and adds up the disk space of the entire renegade directory.

Lol like fuck at the owned picture.

Also yeah we should all learn stealth, like on canyon where there's nearly always some bloody sniper looking into our base and picking people off. I go up there and torch the bastard, and it usually works. But the kind of person that cheats is also the kind of retard that can only snipe, so if I hang around for a minute or two, guess what? The same idiot comes back and I torch him all over again!
