In brenbot.dat, if a player has been entered into the rg_ban section, is this done by rengaard itself or is it done by the moderators of the server, if it is the moderators why does it not go into ip_ban ? I have never noticed it until now so I am a little confused.

Edit* If the player is added to that section is his serial banned also ?

the rg_ban is a serial ban, and its done when you !kb someone on a rengaard protected server. You can manually add the serial bans if you want. My BRCP (link in my sig) will allow you to view/edit them if you need to.
