(Updated Nov. 4th 2005)

Hey if anyone here plays ragnarok i host a private server and need ppl to join my server.

Website: <http://omegaro.no-ip.biz>

Our server only requires the latest sakray and our <14mb Patch.

Server:

3.5 Ghz Processor w/ HT

100 megabit line

1 GB Dual Ram Corsair XMS

120 GB 7200 RPM Hard Drive

(Note: The server can run perfectly while running Half Life 2)

OmegaRO

Rates: 8/8/8 (Rates Changed From 10/10/8)

Server Location: New Jersey - NOW DEDICATED

Emulator: SVN

Registration: _M/_F (We've had bad experiences with web based registration)

GMs:

Omega GM

Zkion

Simari

Warp Blade

Konichi

All GMs are required to be helpful and non-abusive, and abuse results in account suspension or deletion.

Why we're special:

-Up 24/7, except for matinance and repairs

- Custom Town: Asgard

- Custom Dungeon: Asheim

-Unlimited Bandwidth

-Server files backed up every day

-You start with 1337 zeny

-MVP Arena

-Mob Rate is 1.3 times normal

-Custom NPCs

-Shops

-Axe & Mace Shop

-Spears Shop

-Bard & Dancer Shop

-Monk Shop

-Novice Shop

-Armor Shop

-Garment & Shield Shop

-Smith Shop

-Staff & Wand Shop

-Daggers & Katar Shop

-Swordsman Shop

If you can tell me step-by-step how to work and set-up, I'll be MORE than happy to play. I've seen that game down in the Phillipines, it didn't look too bad.

well.. this is a long process so... first u need to download kro and sakray by doing this..
<http://www.eathena.deltaanime.net/board/index.php?s=6254b459874fb836c9ec4af9de1b51e0&showtopic=23682>

u dont need to use download accelorator btw aslong as u get through the proxy stuff. After u download and install both (in korean btw) u need to get a few patches. untill we are able to make a good patch please talk with out officails on our TeamSpeak server "omegarots.info" The people who will help u the most are Vash, Zerreth, Oscar, and Apophis (me btw). Installing Ragnarok is a bit hard but the gaming experience is the best. Since this is a private server it is totaly free as aposted to the ones u see advertised on posters and such.

Pinoy Ako!

OK here i made an installation guide.
To help make installation as easy as possible I took screenshots of the installation process for you to follow.

Installion Guide:

1. Download the Ragnarok Setup and Sakray Setup

- http://www.mave-ro.de/_sub/download/_f/rag_setup0315.rar (rag setup)
http://www.mave-ro.de/_sub/download/_f/sak_setup0315.rar (Sak setup)
2. Click on the Ragnarok Setup to run the kRO Installer.
 3. Click "Next".
 - See Figure 1
 4. Click "Agree" then "Next".
 - See Figure 2
 5. Click on "Browse" to set up where you want kRO to be installed. Then click "Next". (I highly recommend installing it to whatever hard drive you have that has the most space.)
 - See Figure 3
 6. After kRO finishes installing run the Sakray Setup.
 7. Click "Next".
 - See Figure 4
 8. Click "Agree" then "Next".
 - See Figure 5
 9. Click on "Next" again.
 - See Figure 6
 10. Click on "Browse" and choose the same directory in which you installed kRO to. Then click "Next".
 - See Figure 7
 11. Let the installation finish.
 12. Go into the directory where you installed them then click on Ragnarok.exe to update kRO. (Don't worry if it doesn't connect to the file server right away. Keep trying. [Usually works second time])
 - See Figure 8
 13. After the update process is complete click on Exit.
 14. Click on Sakray.exe to update Sakray. (Don't worry if it doesn't connect to the file server right away. Keep trying.[Usually works second time])
 - See Figure 9
 15. After the update process is complete click on Exit.
 16. kRO and Sakray are now finished.
 17. Download our OmegaRO Patch from <http://s117075078.onlinehome.us/OmegaRO/OmegaRO%20Setup.exe> (if u have a data folder plz rename it or give it our sclient.)
 18. Extract it into your Gravity folder. (You need WinRar to do this. If you don't have WinRar click here to download it. Also, if you already have a data folder I suggest you move it out of the RO folder and use the one that comes with this patch.)
 19. After the Patch is extracted just click on the FragRO launcher (in da RO folder) to play. Enjoy!

Sometimes the Figs dont show up in firefox so if u see a box just right click and click show and that works.

In order to log onto OmegaRO you first need to register which is quite easy and dosent require any email. All you do is in the log in menu you type
*What ever u want ur user name to be*_M(for male)_F(for female)
and then what u want ur pass to be.

Ex:

Username: thegunrun_M

Password: fruitbug

Then the second time u log in dont include the _M or _F

RC5 sucks, period. It's old, its exploitable and it's unstable. If your seriously going to host a server, use the latest SVN build off the eathena public SVN.

the new ones are a newer version so u dont have to update as much.
U dont need them now just run the ragnarok.exe and update and same with the sakray and then install my patch .

I have uploaded one of the newer revisions of SVN (1387), You will need to COMPLETELY redo your config files, make a new dir called conf and copy everything in conf-tmpl to it. DO NOT DELETE CONF-TMPL.

Get it here.

The configuration files explain themselves... thats why there is a comment (//) before every directive telling you what the directive does.

Hey I just wanted you guys to know that I am still hosting omegaRO and I have updated the server quite alot since this topic was made. We finally have a website up and a install guide in our faq. Our server no longer requires kRO to work. We are in need of new players. If you want our stats you can find it up in the first post of the topic.
