Was bored and made my first building for cs:s, mostly made for private use now since some
e-mailing between me and EA stopped the project I was thinking on. Guess what building it is

http://www.n00bstories.com/image.fetch.php?id=1172986868
http://www.n00bstories.com/image.fetch.php?id=1292092770

Maybe it looks gay for some ppl but this is my very first building I made.

Except for the fact it looks like a chode barricks

what did EA Say? "We don't want you making anything out of the game we care nothing about
even though we have no plans on ever supporting it fully again because we suck."

Have been talking to EA about this and they say I cant use their textures and I can understand
that and also they got copyright on the map build structures so makeing a 100% copy of the
renegade map is a violation to the copyright....

Added 3 more pictures of the exterior of the building and as you can see Im not done working on

the exterior.

PsycoArmyYeh you need to change everything 60%

Makeing own textures will take alot time and its not worth it either since it never be the same as in the textures from westwood. Think im gonna scrap the idé of makeing a level from renegade to cs:s.

I wouldn't think it would violate anything ONLY BECAUSE the texture files, etc. are all put up for the PUBLIC to download. Besides, I don't think they'd care...compared to what's out now, the Renegade Engine is Pong.

I can understand that they don't want their stuff to be used on a different game. But not allowing to remake everything to look like renegade on a different game... That's just something retarted.

That's so half-assed.

Well if you could actually have your eyes at the same level as your head instead up your ass you could read what I wrote....

IRON FARTNice Weapons Factory.

Long time since we played together but at that time you could at least tell the differens between the barracks and the weapons factory...

Well if you could actually have your eyes at the same level as your head instead up your ass you could read what I wrote...

Try re-reading what I said. If you could shape the top of the barracks fine, then you shouldn't have problems doing the end. Therefore, it was half-assed.

Yeah we should play a game sometime. Too bad SP2 won't let me play right now. (I'm working on it)

View Forum Message <> Reply to Message

I can't. I did a clean install of XP Pro with SP2 already slipstreamed onto it. Plus, SP2 works fine for me apart for some applications not working (including Renegade.)

Nah it's not to do with network connections. It's to do with graphics and drivers and that crap. Too bad I can't put my finger on it right now and fix it. Renegade doesn't even get to the main menu when it freezes up.

That looking promising for a first try. I think you should push forward wiht your project none-the-less because EA couldn't be bothered anymore here.

If you don't have a NEW computer with nothing on it to begin with...DON'T INSTALL SP2!!! Simple enough...I still haven't done it. :rolleyes: Microsoft, either you love 'em or you hate 'em. (Maybe there should be a poll...)
