We're down because xptek ripped my hosting down after I was thrown out of Crunge and protested it. I got new hosting, and I'm just waiting for it to be set up. Then we're gonna have a new design, so it'll be up by next week, hopefully.

Also, "Aircraftkiller", he's not posting just to ask why the site's down, he's also trying to get an opinion on his layout.

I think it's overkill. Take a step back and look how busy the design is. The concept is great but for the amount of elements there are I could build two designs.

Keep it up!

No, it's because most of you are idiots and don't know anything more than how to whine about people that you don't like while making hypocritical statements over and over...

That's why this place sucks for actual criticism, because if you compare any of your half-ass comments to a real artistic critique you'd see what I'm talking about. Then again you're an idiot too so I'm not putting much faith in you getting what I'm talking about.

No, too busy hurts your eyes. You can't concentrate on the content, and too much on the design can actually give you a headache. I just don't like how gbull has it laid out. It needs to be cleaner. That metallic 3D look is quite annoying. The rest isn't bad, but he needs to tone the site down. Also, make the site brighter. Having it 90% black doesn't do much for me.

Artistic comments.... "This taste like ass" enough said. Your not going to defend yourself by saying im a hypocrite. Every moment of life is hypocritical so its not even a valid judement to my character. You just cant take that your status has dropped so low lately from your actions, just pull it back a round and everyone wont hate you again.

ROFL.... chastising others about being hypocrites while doing it yourself in the same sentence?

That's what we all love about you Ack.. you're a fucking retard, and you honestly don't even know it. You're so high on yourself that you can lecture people over the same thing you do to others 10 times a day, then throw some ad hominem and bullshit excuses around when anyone points it out.

If we wanted to compare any of your half-assed comments to real artistic critique, we might as well just discuss the similarities between cock rings and tofu..

Keep saying that you don't care what anyone else thinks about you... 10, 20, maybe thirty times a day, I'm sure you'll actually start believing it eventually..

i like the first one better..

its not too busy for me..

its very much a gamer style site..

if thats what your gonna use this site for..

only thing i dont like or need to improve on is in the content area..

the design you have at the top just doesnt fit.. looks outa place..

like you just slapped it on there.. needs to be more intergrated into the total design.. or just get rid of it period..

and i like dark black BG sites.. im more of a night users.. i hate bright sites

In reference to your first template
I'm likin it, you might want to spice up the modules a bit though (I think that's what they're called), they seem a tad bit dreary. Also, experiment with background color and module color, cuz just black might not look to good from a user point of view, depending on how the layout is sized up. Other than that, just work on some of the colors, the wires (as said earlier), maybe add some kind of opaque texture to it. Pretty good overall

And just because I actually made a post, I must note that the 'arctic' thing in glyde's siggy looks like people having sex. haha.

No, it doesn't. Black and Dark Gray sites are horrible. They're too dark, and do absolutely nothing for me. You need color. Now, I'm not saying make it all of the colors of the rainbow and then some, but make it brighter and easier to see. The object of the layout is to accent the content, and it can't accent if you can't see it.

I used some white color overlays and set opacity to 30%, Better, or worse? I dunno about it myself making it brighter like this might not be the way to go.

btw, that banner wont stay the way it is now, Im gonna change that as soon as I get good Abstract Brushes, give me a link to good ones if you have some.
