OGM OGM OGM OGM OGM OGM I CANT USE MODZ WTF I HAT U RENGARDE!!!11

Just run game2.exe and host using your damn mods. No one is stopping you.

And testing is a waste of time. Get RenGuard and you won't have this problem. In fact, there should be no problems whatsoever. 'Tards.

He does have a point with non-RG people not having access to all of the commands. That's really unfair. I think non-RG should have access to pretty much all commands he would have if he were running RG, except for !forcerg. They should be allowed to use !rg on themselves, but no one else.

I really hate it when RenGuard starts acting up saying I've got some bad file, so I turn RenGuard off, and immediately lose access to !donate and !showmods, among others.

You know what? The SERVER OWNER is allowed to run his server any way he wants to. If the server owner wants you to yell "Banana Lemon Peach" when you join the server, or else get

kicked... guess what? You have to do it if you want to play there. They pay for the server. If they want you to run RenGuard to play there, then you have to run RenGuard to play there. If they don't want you to run any commands on their bot unless you run RenGuard... you guessed it, YOU HAVE TO SUCK IT UP AND DO IT IF YOU WANT TO PLAY THERE.

I don't understand why so many of you think you have any rights on ANY server. The server owner is GOD on their own server. BHS provides RenGuard to any server owner who wants to use it. If they choose to use it, DEAL WITH IT. They pay for the server, not you.

Now GROW UP.

Quote:"UNRULES : NEW MAPS" And Getting Kicked for not cheating
Thats right, we only allow cheaters to play on our server :rolleyes:

ohh also you're confusing zunnies servers quote, "Fat-ass n00b not running renguard..." all the stuff on un servers are stock cp1 patch.

no non rg users shouldn't use be allowed to use commands, commands don't effect gameplay they are just something extra, the only command donate that may change something isn't allowed on our servers.

Let me guess the person who plays here is from Norway or Netherlands...

I really hate it when RenGuard starts acting up saying I've got some bad file, so I turn RenGuard off, and immediately lose access to !donate and !showmods, among others.

...is this guy a n00bie n00b n00b? It's to encourage people to get the less than five minute download and use RenGuard, moron.

RenGuard *is* a pain in the ass, sometimes. Just recently, I myself had a problem with RenGuard. It was claiming that always.dbs was corrupted, yet when I'd download that from someone else, it would still claim it was corrupted. It wouldn't claim such for the person I downloaded it from, though. So, I disabled RenGuard for a few days, and I was still able to play fine (eg, no 'version mismatch'), though without access to various BRenBot commands.

I just re-enabled RenGuard, and it seems that it has stopped complaining about that file. What's wierd is that t's now the original file that was there when it started complaining.

So really, until you can guarantee me that such occurances won't happen, I strongly feel that it is unreasonable to want everyone and their dog to use RenGuard. Maybe when RenGuard 1.04 comes out, bugs may have been fixed. But until then...

It's really annoying especially without !showmods, because non-rg people who can't use RenGuard for reasons stated above (or other legitimate reasons) are then not able to find out who the mods are for a server to complain about someone else which may be cheating.

Also, if you know me, then you know that when when I have a fair amount of spare credits, then I try to !donate the extra to the less fortunate members of my team. That's something that I have not seen anyone else do on a regular basis. Not having access to !donate because of a silly problem with RenGuard doesn't hinder only me in such a case, but my team as well.

The reason you don't get access to !showmods is because most cheaters will use that command to check for moderators before cheating.

Well, if you don't make *any* changes to whether or not non-RG people can use various commands, could you at least make it so that it uses private messages instead of admin messages? It would help prevent people from getting killed for standing too still because an admin message popped up for half of a second for trying to use a command that they didn't know/forgot that they don't have access to.

All that is configurable by the server admin...

That's something that I have not seen anyone else do on a regular basis. Not having access to !donate because of a silly problem with RenGuard doesn't hinder only me in such a case, but my team as well.

If you ask me, I believe you hardly know anything. Hardly anyone can say they had bugs, and it's only the cheaters that say they do then as a way to try and get the server admin to change the rules.

Not having access to !donate because of a silly problem with RenGuard doesn't hinder only me in such a case, but my team as well.

If you ask me, I believe you hardly know anything. Hardly anyone can say they had bugs, and it's only the cheaters that say they do then as a way to try and get the server admin to change the rules. Care to explain to me how you think I 'hardly know anything'? I am not a cheater. Test me anytime, anywhere. I am not saying I have bugs 'as a way to try and get the server admin to change the rules'. I really have encountered problems with RenGuard. Legitimate problems. It would be nice if server admins change their rules, but you know what? I resect server admins. I'll still play under their rules, because it's *THEIR* server.
