I have a problem:
Quote:C:\WINDOWS\SYSTEM32\SVKP.SYS

Is the Trojan horse TR/Pakes.2
I get that from my antivir when I try to run Renguard. I tried to run game2.exe too and it worked just fine. I unistalled renguard and installed it again. It still gave me that warning, when I push delete file in my antivir it then says Error: loader couldn't initialize service! I unistalled, downloaded RG-installer again and installed it again. Same thing...always gives me that warning. What should I do? Again: The game2.exe works fine.

So it's not even a trojan? I mean I can put it to ignore it, but what if it is a trojan?
I have AntiVir XP

if you downloaded it from the officail site it cannot be a trojan unless another file on your computer
infected it

To Fix it

Uninstall your Renguard

After that Got to (Start > Run > Regedit)

And Delete This Reg key

HKEY_LOCAL_MACHINE\SYSTEM\Contralset001\Service\SVKP

And If you Use AntiVir Go Update it they Fixd the Problem

I tried to push 'ignore', but it still didn't work for some unknown reason...
Thank you Sibercat, I'll try that next. I hope it works.

Some antivirus label SVKP as a "trojan" simply because some trojan they found was wrapped with it. It doesnt mean that everything wrapped with it is a trojan, any more than every .exe is a trojan, but yet they lablel it so. It is safe to ignore.
