I have always wanted to have BrenBot and creat servers of my own for people to play in, but I havent been able to get it to work. What do I need? What is a working link from which I can download BrenBot? (I downloaded SS-CP1.3) What does FDS stand for? And, can anybody make a server with BrenBot? Thanks for reading, and please answer

FDS means free dedicated server, get it ftp://ftp.westwood.com/pub/renegade/dedicatedserver/

brenbot, blazer renegade bot, is an add-on to help you monitor your server better than the FDS does. youre supposed to get it at http://www.brenbot.com but, ridiculously, there isn't a link to its download. I agree though it is all a bit confusing.

Unfortunatley ALL of the serials have been taken. So you're out of luck unless some one gives you one.   :huh:
