I was just wondering how do you actually do this? The Black-brigade server had a few problems with the name hack and I want to suggest this to them but I dont know how to this.

Send "help" in a private message to your brenbot on IRC, the rest is fairly self-explanatory Don't forget people with a voice or higher on the IRC channel can use "!auth nickname" instead of PMing brenbot with the password every time.

Quote:<n00bsvr01> Valid Commands:

<n00bsvr01> register <gamename>

<n00bsvr01> auth <gamename>
