I was downloading the core patch when an error came up. It was trying to patch cc_city_flying.mix when it said an old file was missing. Someone help please!!!

Hmm, I've had before. I don't think it can harm.

Had this problem with the renalert always.dat

had to get someone to send me their updated one over MSN..

the problem is that shitty installer that always comes up with the "old file not found" error. I hate it.

add me dogg323@hotmail.com to your msn and i'll send you the updated city flying one.

It means you need to upgrade Renegade to version 1.037 before you install RenGuard. The reason City_Flying is missing is because it wasn't included in the public release.
