Aight I messed up. Trying to use F8 to fix lag I hit a button. My fonts are all screwed up in the game. I can see the overall game great, but cannot read chat, or see player names. This also affected the graphics when the game starts up, at the opening window while game is loading. I can't read the text, very blurry. Any ideas??

I think entering 's' into the console does that. Put it in again to reverse the changes.

no, he pressed F8 and typed in S instead of sbbo or whatever the lag command is. Pressing S alone wouldn't do terribly much, apart from move you slightly left
