Okay...

I don't know if I should say this, but just join a mod that needs a concept artist if you feel your concept art is good. No one is really modding Renegade to a huge extent anymore

I know. But I do want this mod to come true. I will find people that are interested to work on it, and slowly complete Renegade\_me.

I suggest you got help out the FoF mod. I was thinking of doing a middle earth mod for another game engine, That is mostly because I'm play Lord of the Rings: The third age right now. I wanted to make a Dragonball Z mod when I was playing Dragon ball Z: budokia 3, I even started modeling a character for it. I get this way every time I play a good game.

If your going to make a mod of LOTR I think it needs to be an RPG.

Quote:the FoF mod

Where can I find this mod?

And I dont want to make a RPG... The reason I am making this mod is because I really want to be able to have big real-time wars in a Middle-Earth setting, they have to be fast paced and quick, not like the average live action RPG.
