What are the ports used by Gamespy, Renguard and Renegade?

TCP? UDP? and wich ones?

I need to know it to configure my Belkin Wifi router and my firewall.

Thank you.

Mac, can you help me on this?

I need to setup my virtual servers on the router.

TCP,3840
 TCP,7000
 UDP,1234-1237

im pretty sure

Well I found all what I needed.

I only miss the renguard information.

Mac, any idea?

It would help to have less disconnection from renguard with my firewall.
