The most recent version 1.41, why do you want 1.35?

Remeber 1.35 doesn't include Renguard.

nopicjust use n-bot
it come with rg locate donate etc much more

go to stuffedreptile.com and pm me ill give it

N-Bot is a ripped version of CFGuard, which is built off NGSGuard, with the owners permission. It was not made by nopic, and I am surprised he knows how to use it.
