hey evrytime i try to run brenbot it says FATAL ERROR: Primary IP not found

but it is good

RenRemLinuxHost = 127.0.0.1

RenRemLinuxPort = 4949

(and password down here duh)

screenshot go to this link for screenshot

Add Gamespy_IP = 127.0.0.1 to brenbot.cfg, you can replace 127.0.0.1 with your ip if you want, but it's not necessary.
