Does anybody know how to kill the renegade installation on a PC?

Point is: I let friend @work have my renegade CD. Well as hes an n00b, he may start to cheat or shout ppl in chat rooms. We share from time to time the same IP, yea he can even use my PC station for some hours. I always pay attention to log off with my nickname without saving password. But the main problem is: I'm scared that anybody will accuse me of cheating. So is there a way to get the cd key out of his computer, hes using a no cd crack, so I just need to delete my serial... but how?

Please help. Never give ur cd away, if ppl want the game: they should buy it

you could write a registry file that can edit or even delete the serial key from his computer. The only problem is that you'll have to get the file onto his computer and launch it.

cd key is located in in the registry, click on start, run, type regedit and hit enter. Now click on My Computer>HKEY_LOCAL_MACHINE>SOFTWARE>WestWood>Renegade
Now right click on Serial and change/delete it
