Sometimes when I host a game, in the middle of the game the gameplay begins to pend and I lose my character. Then a person comes in with my screen name pretending to be BumishBK. I know it is a hacker, i do not know how to stop it. If anyone knows how to block them out, or if you can at least explain to me what is going on please reply!

I will try to post a ss.

I am assuming you are not using a dedicated server.

Try the patch just released by Silent Kane. His version might only work for the dedicated server, just make sure you back up all the files you have to over write before you update them.

Link to thread about patch: <http://www.renforums.com/viewtopic.php?t=14810>

Ty, i will try that, but while on this point, what is the difference between hosting a Dedicated Renegade Server and just a regular, b/c when i host a DRS i can not play in the game- gameplay is pending.

Dedicated = you don't play on the hosting machine.
