I extracted the reticle files from always.dat and made a new reticle. But when I put it in my data folder the reticle is extremely small in the game. What is the problem? No matter what it turns out very small. Thanks for the help.

deadfiveNo matter what it turns out very small. Thanks for the help.

We can't help it if it is small.... unfortunatly that is your problem and not everyone is gifted. Myself, I have a rather large one.

Take a break from these forums for a few years. Also, you've managed to tie your personal high score for most threads created on one page! Are you going for 7?

GDIDF

And this is Mod Forum Material.

Make one topic and ask every question you could ever ask on earth, then we'll be happy.

Jeep Rubil had a similar problem but instead of it being small there was a black box around my rectile.

Go see the doctor.
