Not bad, release them so people can put them ingame. Unless, of course, they are not your models as you claim them to be.

I have to admit the uzi is awesome. but still no matter how much anyone tries they can never come to close to this ak-47 my friend made. I dont have any screens of it. But i see you used a picture of an uzi as your texture. If renegade mods was up I would show you an uzi that the same person made with the same pic. the only difference is you can get the whole poly unw\*\*\*\*\* thing to work and you lightened the texture.<http://www.statikvision.com/invision/uploads/post-13-1036353085.jpg>thats the uzi.
