It has a ton to do with that, Photoshop Elements Three is very cheap. Just because I live here doesn't mean you need to get all vulgar, though apparently you must think that everything someone says to you is an insult, you volitile bastard.

To be honest, I do spam, I'm a spam monkey, I don't really have anything better to do in these months near the end of school because all my friends are busy. So, I get to sit here and spam.

If Crimson feels that I'm somewhat overloading the database with spam or something, then she can PM me, but until I get something like that I'll continue to post my posts. Okay?

If you are smart you wont risk it by letting PS contact adobe with the details you are trying register with so they get your i.p.

Look I am 15 years old. Why would you even want to threaten a 15 year old with a sentence that makes him wonder if his life is ruined. If Oblvian, if you really did submit this to adobe, my life is over. I am too young to even realize the big mistake I am doing by getting this crakc or whatever, it is a Federal Offense to get cracks I just found out a second ago from my parents. Why would you want to ruin someones life who you have never met and who is only 15 years old? I mean lord help my sould if you really sent this to adobe, not only could I go to "The under aged prison" for life but then you would be ruining my whole life which is my fault mostly. What I am saying is if you did submit that to adobe, and they did file a lawsuit or something, my chances in life would be 1 in one million.

I don't know if you really did it or not, but the fact is, I am scared. I mean it. I don't want any part of these forums anymore, because it is just trouble, and most of you always talk about hacking the people you hate. Goodbye. I don't want anything to do with these forums again.

EDIT: To the administrators of the forums: Please delete my account. Thank you and goodbye.

And seriously, I hve about £3000 of cracked software and illegally downloaded music on my computer, I aint had any lawsuit. What a friggin idiot.

Companies like Adobe would go for people burning copys of PS and selling them for £25 or so mass production not some lame 15 year old spammer getting a serial key.

And if he seriously didn't read it maybe he should reads the terms of use, end user liscence etc. Fucking idiot.

dark_hell_firei bet you need baned to dick

Man, got to love those sentences that no one could possibly understand.

1. Get a copy of MsWord.
2. Type all of your post in MsWord
3. Let it correct every one of your sentences for you
4. Paste it in the Reply window
5. Hit submit

That should get you in "bidness" for forum participation.

This just gets more and more pathetic as it goes along. Your life isn't "over" if he reported you. The worst they would (not could) probably do is fine you. Honestly, go to juvinille detention center for life? HA! You're 15, and you act like you're this innocent kid who has done nothing wrong. You spam, then you bitch and complain when people don't compliment your site. The list could go on. This community isn't for pussies. You have to really try and be a part to fit in. Either you love the community or you hate it. You obviously hate it. Goodbye.

As for dark_hell_fire, you're going to be one burnt to a crisp retard if you think you are gonna get away with bitching at everybody.

i smoke pot

i doubt any one would waste 20 seconds of their life even looking for a "report a cracked serial number user hacker 15 y/o Link"

the way i see it..

adobe could care less about people hackin their stuff

in the end.. EVERY ONE wants PSCS
why is that? cause every kid in the usa has hacked it and says
"omfg PSCS roxxors" so its free advertising on one hand

and there are kids and adults out there that do buy PSCS

ADBE - Annual Report
Sales - 1.7 Bil
Income - 479.3 Mil

and thats with everything adobe makes..
their way to busy doing their job making better products
then chasing shareware hackers

j_ball430No beef with it, it just doesn't compare to PS.

I use both tools and I can say that they both have their effective uses. Neither is better - just Photoshop has been marketed better thus it's more popular and more widely used. If you were to use these tools professionally then you would know what I'm talking about.

The good thing about an ICT student is the fact that everything you program or do with school is for a part property of school, even the bad stuff .

It's one of those moments in the year I agree with Aircraftkiller.

And guys come on, so what he posts alot of questions. You guys reply alot what's the diffrence. It's just as easy to ignore you reply's as his posts. And It's not like all his posts are just basic spam. And don't say his posts move other topic's to the 2nd page, baccuse It's not like this forum is so active.

So what he isn't talented in making websites, is that really a problem. The only reason he posts this much is because he wants to improve himself in making his website. Wich although still doesn't look perfect at least has improved.

I don't say you should not make fun of him, but comeon take another hobby. he lately gets the most replys on his topics. Aircraftkiller is keeping a bit low a few weeks and you guys have a new hobby to complain about.
