When I start up my server, it loads the map, then it ends the game, and then loads the next map. Any help?

Also I can't command my server from IRC, I try but it just doesn't work. The ports are right I believe but I don't know how I could fix this.

The map ending is a normal thing, its ment to happen.

The commands not working is either ports, a password mismatch between your server.ini and brenbot.cfg or an ip mismatch in the those files.

Thanks, well I seemed to fix the command problem, I think it was something wrong in IRC, I would like auth once and become my status and auth again and it would do +a and then it wouldn't work, but it works now, adn thansk for tleling be about that map ending thing.
