Hey guys,
Just a bug i found with Renguard.

Mac could you please add a reconnect button to renguard.
If we have renegade open, but we get d/c'd, we have to restart renguard/renegade to reconnect to the network. This is a pain in the B%T&

Thanks

It's a known problem, and will be fixed in RenGuard 1.04 (or at least, that's what I'm told).

Well to start with, the new SSAOW has bugs through the roof.

e.g use any of the logging system and it crashes the server.
and the new renegadefds bug where it cant be loaded by programs else it just closes.
