ok this has been happening for some time now!

at first i thought it was GSA but its not cause i tried to switch from using gsa to the all seeing eye program! and still getting the same shit!!!

when im in game i get kicked! not by ppl i just get disconnected. and ill go back into that server and about 5 mins. more or less will pass and it happens again. Well i have no other idea then, that its Rg. Its frankly piccing me off ROYALLY!!! i lose tanks and shit and cant play as of lately.

i tried going into different servers thinking it was that one server and thats also not the problem!!!!

and what pisseess me off more is that it picks and chooses when it fucking eant to act up!!!!!!!!!!!!  
GRRRRRRR

and i know its not my internet service cause im not getting kicked fom msn messenger nor yahoo when this happenes. and i know its not like my picg or fps cause im usiall at 60 fps and thats max i have!!

very pissed and frustrated some one plz give me some freaking ideas!!!!!!!!!!!!!! how to stop this shit from happening!!!!!!!!!!!!!!

RenGuard does not interact with renegade in any way.  
It gives you a reason in the renguard messages window, when RenGuard closes your game.

I think you set your connection in Renegade too high or too low.

---

And how can you be sure that the problem is renguard?

---

(sorry for this unhelpful post, but it's important and you didn't say if you tested it without)

the reason i think its rg is cause i am trying 2 ways to get into renegadrde and gsa closes out every 5 mins and all seeing eye closes out ever 3 mins.

and i didnt set my connection too hight casue i have 3 meg internet service. so how ever its set it did it its self. and the allseeing eye ran a self test to test my internet.

i wonder if my problem has anything to do wiht the rg reconnect problem a another dude is having?

and also i dont gget any messages from rg wwhen i get kicked just saying i joined and left servers is all. ITs pain in the fucking ASS casue i cant play more then 5 MINs. So one plz help!

Do you have more than one computer that uses internet at your home?

If yes, you have then a router. You need to configure it to avoid disconnection.

The firewall of the router and windows xp must be configured too. You can also disable those but your computer won't be secured anymore.

If you have a router, I can explain you how to configure it.

well the funny thing is i have the best internet speed that charter provides. and yes i have a router and firewall.

but i also have windows 2000 professional on here.

i dont really think its the router or firewall but not susre. cause i dont always have the problem. like i said it pick and chooses when it wasnts to run and not

Okay, try disabling your firewall, and play with RenGuard running. I'm 99% positive it's your firewall.

ok if that may be the problem! but that still dont explain why7 it never used to happen b4 and now it does. been playing ren since feb 2003 and havent had this problem till i started using renguard.

and even if per say it is the firewall i cant always leave it disconnected

Of course you don't want to leave it disabled. What were the results, anyway?

well i havent turned ren back on yet i will in a few mins and i i remember will leave a message about it tomorrow

ok every time i try to go into a server and its playing a map i dont have i get this annoying pop up and it frezez all of renegade for a few mins and then when it comes back it says

game2 has generated errors and will be closed by windows.

something to that extent. but i dont get why it freezes!!

and i have ren back on so far its not acting up but it is taking forever longer to get into game!!

EDIT: and another thing that i dont like about renguard is the fact that when i dont have it on i get into games almsot instinetly. then when i have renguard on it takes forfever and im constinetly waiting at the gameplayending screen, b4 the new map loads. WHICH SUX

hmm i havent had the problem with renguard in awhile but u guys should think about making renguard faster to load. cause i do see that it slows me down a lot getting into games. but other then that i cant really think of much more thats needed.

OTHER THEN THE BHS SUPPORT PPL NEED TO BE MORE ACTIVE IN THAT WHEN SOME ONE NEEDS INSTANT HELP!!!!!!

whats the fuck is wrong with renguard now. I dont have my firewall on any mroe cuase renguard is a bitch with it.

well i cant play now cause renguard is giving me an error message saying ""unable to initalize netwars, perhaps renguard is incompatable with renguard"

the funny thing is i dont have a firewall running so its fucking renguard

help

the renguard network is having difficulties at the moment, as far as I am aware most if not all people are unable to connect to rg.

---

Core patch 1/2 wont have the ability to fix bugs i dont think. Furhuremore, to the guy who posted above, i agree with you they dont affect the game other then maps and powerups and sounds. (may sound like alot, but if you know your games, then you should know that those three arent alot.)
