Explain what your talking about might help. But if you are talking aobut a nuetral team on Renegade and being able to get to it, an host with Renguard can do it by using the TEAM and TEAM2 commands. For example, if the player list looks like this:

1. Deadfive
2. Bob12432
3. GGe

Say you wanted GGe to be nuetral, this is how you would type it in:

Hit F8: TEAM2 3 2

F8 for consol, TEAM2 for the command, 3 because bob is player 3, and 2 for 2 is the number that represents the nuetral team.

What does Renguard have to do with any of that?

all you need is the latest scripts.dll
