If my friend/brother/dog tried to exploit RG on my computer, I'd beat the shit out of him.

Why is it always the friends who try to do the RG exploiting?! Do it on your enemy's computer ffs =O

A few years ago. Am I getting old or isn't it true that renguard has not even beem much more than

1 year around?

I thought it was your brother, who didn't live there anymore? Why would he need to change if he doesn't play it anymore?

Unless, you mean that you can change....

hi this is my situation:

a few weeks back, I was lookin for skins and came across an M16 skin, so i d/l it. Then after puttin it in my data folder i proceeded to play renegade which opened renguard and i clicked renegade as normal and went to my fav server (Xilserver). but when I got there I got a renguard pop-up sayin "get renguard now etc..."

so I thought it didnt connect to server. So I exited game and ran renguard again, but this time I waited, and it said I been banned for tryin to bypass renguard! why? I did get to use the M16 skin which looked pretty cool, but renguard must think its a cheat the file was called something like M16.w3d, was this file dodgy? and I was wonderin if I could get unbanned coz this is just bogus! I cant stand cheaters and dont really see the point in it. I wouldnt be askin to get unbanned but it sux not bein able to donate to ppl in game, and forcerg those cheatin bastads! so plz consider my case

thanks

If you have a file that hasn't been approved, you just get kicked off of RenGuard and Renegade closes. It doesn't get you banned.

[View Forum Message](#) <> [Reply to Message](#)

The reason you can't use the w3d file, is because all w3d files can be possible cheats. A w3d files has to be first approved before you can use it with Renguard. You won't get banned because of having a w3d file in your data directory but you can't use Renguard until you either removed the file or the file has been officially approved.

My advise is removing the file from your directory and see if you can now run Renguard, if not there must something else wrong.

well im stumped, i took the file out a while ago and still no luck I also thought it to be a lil strange to ban me for 1 file, perhaps there are some other dodgy files that came wit it, grrr... Am I doomed to be a non-rg player for the rest of my renegade days?

thanks for the advice tho guys

this is a screenshot of my data folder, is there anything dodgy in it?

as u can see i went a bit skin crazy, even managed to learn how to make my own skins

The sniper dds files might be suspicious. But not for a Renguard ban.

mozaik, first you should of started your own thread instead of posting in an existing one.

Second, I see o_flag.w3d << I don't think renguard would like that file. Renguard doesn't like w3d files.

And you were baned for "tryin to bypass renguard!" i'm sure it has nothing to do with M16 skin or w3d files.

nope those head files are just head skins for the engie and grendier etc, since not all the skins are full body and head. I dunno wat that w3d file is, i think it came wit 1 of the maps.
Well it looks like I got no chance of bein unbanned

mozaik, If I were you I would try to speak to one of them on IRC.

The moderators won't read this post anymore, because the original poster won't be unbanned

because he Lied about his ban.

So either try IRC or if that doesn't work, create a new post.
