When I try to connect to a game using Renguard it does it's checks and then I get this:

[23:36] Unauthorized file game2.exe has been found in your renegade directory

[23:37] Disconnected from RenGuard network

Have I done/ installed something wrong??? What did I screw up?

I just had to reformat my HDD and reload everything because of a new virus (Microsoft new it was a virus but hadn't seen it before).

It is strongly recommended that you do not download "unknown" No-CD patches as these may get you banned.

the only patches I have downloaded and used came from EA games, fileplanet, and Blackhand Studios websites. So I guess I'll try to uninstall and reinstall.....

Are you running Anti Virus? Its possible the file was changed by a virus possibly...

<http://www.free-av.com/>

Good Free Anti Virus-^
