When I try to start my server from the shell i get:

*** Auto starting game. Type 'quit' to abort ***
Repeatedly Over and Over

I have it set to use WOL.

Some one help me please.

The LFDS (Linux Dedicated Server) cannot be set to host
on Westwood Online.
The LFDS can only host on GameSpy.
There is nothing you can do about this, if you want to host on
WOL you have to get a Windows Server.
