Ok I installed the SS-CP1.3 and then i configured everything but the brenbot doesnt do anything at all.. In irc it tell you when someone purchases something but you cant get any commands to work..Like i tryed to type !help nothing came up and in the games tryed tp type !rules nothing came up can someone please help?I was just wondering if i need to have the remote admin enabled to make everything to work..And if so can someone guide me through it?

Your guess is right. You MUST enable RenRem for BRenBot/BR.net/DragonServ/NightRegulator to work.

also when you are in irc you have to be set as an op to make all the commands work.
