While working on a plugin for the new brenbot when it comes out, I created a new version of BRCP (Brenbot Control Pannel) to speed things up. I've made it more stable and its now available for download at:

<http://www.ruddles.com/info.php?id=BRCP>

The 2 new sections allow you to remove people/change the passwords of !auth in the database, and use raw SQL through this control pannel to give you greater control over your database.

As always, comments/suggestions/bugs are welcome, although I'm bloody busy and don't actually play Renegade any more *blah blah yadda yadda ect*.....
