I was just playing on renegade useing renguard 3 hours ago and now it says "Unable to intialize network, perhaps your firewall is incompatible with RenGuard" WTF is going on here, is rg down or what. It is not my firewall, rg has been working for 3 mounths and have had no problems.

the rg network seems to be down at the moment, possibly the servers are full or have a problem.

Same problem here. Using F Secure firewall. Everything was fine a couple of hours ago.

Quack
